

100 Days of Azure DevOps

Day 4 Handout — CALMS + DORA without the buzzword fog

Learning in public · Personal lab only · Educational content · Not a sales pitch

What you will understand today

- **DevOps** is habits + outcomes — not a job title or a laptop sticker
- **CALMS** — Culture, Automation, Lean, Measurement, Sharing
- **DORA** — four metrics that expose theatre
- Agile and DevOps **complement** each other; they do not replace each other

High-level architecture — CALMS

Architecture A — CALMS scorecard

Letter	Means	Red flag if missing
Culture	Blame process, not people	Who deployed? is the first question
Automation	Script what you repeat	Click-ops at midnight
Lean	Small batches, less WIP	Big-bang Friday releases
Measurement	Numbers beat vibes	Only metric is ticket count
Sharing	Runbooks + postmortems	Only one person knows how

Architecture B — DORA four keys

DORA metric	Question it answers	Why it matters
Deployment frequency	How often do we ship?	Smaller changes, faster feedback
Lead time for changes	Commit → production how long?	Friction in the path to users
Change failure rate	How often do releases hurt?	Quality of your delivery system
Time to restore	How fast do we recover?	Resilience when (not if) it breaks

One-liner to remember

CALMS = what good feels like · DORA = how you prove it · Tools without habits = theatre

Step-by-step lab (20–30 min) — no Azure spend

Concepts only today. Be honest. Nobody grades this but future-you.

- 1 Score yourself (or your last team) **1–5** on each CALMS letter
- 2 Circle the weakest letter — that is your next habit to build
- 3 Pick **one** DORA metric you can measure on a personal lab later (even deploys-per-week to a throwaway App Service)
- 4 Write three sentences: what “good” looks like for that metric in six months

Scorecard template

Culture: _ / 5
Automation: _ / 5
Lean: _ / 5
Measurement: _ / 5
Sharing: _ / 5

DORA metric I will track: _____

Done checklist

- I can explain CALMS without reading a slide
- I can name the four DORA metrics
- I filled a 1–5 scorecard and picked one metric to track

Tomorrow — Day 5

Azure DevOps Services overview — Boards, Repos, Pipelines, Test Plans, Artifacts.
