

100 Days of Azure DevOps

Day 98 Handout — Profiles are loud — read the contract before you hit publish

10 - Portfolio & Public Launch · Personal lab only · Educational content · Not a sales pitch

Architecture A — two volume levels (portfolio vs paid profile)

Surface	Volume	Today's default
GitHub + case study (Days 94–95)	Quiet proof	Already public if you sanitized
LinkedIn learning posts	Classroom volume	This series — educational, no hire-me CTA
Paid-work marketplace profile	Loud — implies you are for hire	Draft offline; activate only if policy allows
Personal site contact form	Medium	Optional; still not a sales page in this series
Work laptop / work tenant	Forbidden volume	Personal equipment, personal time, personal Azure

Architecture B — policy before profile

Check	If allowed	If not allowed
Moonlighting / IP clause read	Draft the profile in a local file	Leave it as a local draft; GitHub still exists
Equipment / time	Personal PC, personal hours	Do not build the profile on a work laptop
What you sell (later)	Skills you can demo from the capstone	Anyone's customers, any employer account list
Platforms (Toptal / Braintrust / Upwork, etc.)	Create only after the clause is clear	Browsing a marketing page is not a profile
Portfolio links	GitHub + case study are enough to wait	A loud profile without proof

Architecture C — loud mistakes

Pitfall	What you see	Fix
Publish then read policy	A live paid profile and a contract problem	Policy first; activate second
Work tenant targeting	You almost list employer customers	Never. This series is not a prospecting list
Work equipment	Draft on a corporate laptop	Personal device only
Empty loud profile	Marketplace live, README still 'TODO'	Days 94–95 first
This post as a hire-me ad	CTA, calendar link, brand sell	Educational reminder only

One-liner to remember

Profiles are loud — make sure your contract allows the volume before you hit publish.

Step-by-step lab (personal Azure / Azure DevOps only)

Personal time and personal equipment. Read your own agreement. This handout is not a marketplace tour and not an invitation to hire anyone.

- 1 Read your employer moonlighting and IP policy (if you have an employer). If you are independent, write that fact in the notes. Do this before any paid profile.
- 2 Create docs/profile-draft-day98.md offline: headline, three bullets tied to the public capstone, links to GitHub and the case study.
- 3 Checklist in that file: policy reviewed, portfolio links ready, personal equipment only, no customer targeting.

- 4 Do not activate a paid marketplace profile today unless the policy clearly allows it. A local draft is the lab.
- 5 If policy says no, the draft stays a draft. GitHub and the case study remain the quiet proof.
- 6 Do not use a work laptop, work tenant, or work time. Do not target any employer's customers.

Offline draft checklist — volume is a choice

```
# docs/profile-draft-day98.md
# [ ] Moonlighting / IP policy read (or N/A: independent)
# [ ] Personal equipment / personal time
# [ ] Portfolio links: GitHub capstone + Day 95 write-up
# [ ] No customer targeting, no workplace leak
# [ ] Paid profile NOT live unless policy allows
# Headline draft: Azure DevOps CI/CD – public demo-shipboard walkthrough
# Activate later. Loud is not the same as allowed.
```

Done checklist

- Policy read (or independent noted) before any paid profile
- Offline draft exists with portfolio links
- No work laptop, no customer targeting
- Paid profile still off unless clearly allowed
- This post has no hire-me CTA

Tomorrow — Day 99

Outreach and pricing as a thinking exercise — boundaries, not a sales PDF
